Mentor-ACM Workshop
January 2024 to Present

- Actively engaged in content creation and mentoring.
- Designing project & planning
- Working on designing

PROFILE

I am Read Hasan, a dedicated Software Engineering student with a strong foundation in programming and application development. I have experience in building projects using React and Flutter, and I enjoy exploring new technologies to enhance my skills. Passionate about problem-solving, I am eager to contribute to real-world projects, improve my expertise, and grow as a software developer.

PROJECT

- **Blood Donation Management System** | React, JavaScript
  Developed a web application to manage blood donation records and requests.
  GitHub Repository
- **E-commerce App** | Flutter
  Built a mobile app with product browsing, cart, and order features for an e-commerce platform.
  GitHub Repository
- **Habit Tracker App** | Flutter
  Designed and implemented a mobile application to track and manage daily habits.
  GitHub Repository
